COM distance to reward — C:pre→post frozen replay (left) vs A–B RL policy (right)
C:pre→post COM (frozen replay)
mean Δd = -0.018, 62% toward p = 1.8e-07
C pre-RL (frozen)
C post-RL (frozen, same traj)
Neurons
COM distance to reward
A–B COM (policy / exploration)
mean Δd = -0.048, 67% toward p = 1.1e-13
A prediction
B RL policy
Neurons
COM distance to reward
