Frozen-replay field shift (512 paired place cells)
Centre-of-mass
50% toward reward, p = 8.9e-02
mean Δ = -0.017
Neurons
Δ distance to reward (post − pre); < 0 = toward
Peak (de-confounded)
68% toward reward, p = 3.3e-20
mean Δ = -0.113
Neurons
Δ distance to reward (post − pre); < 0 = toward
