COM distance to reward — C:pre→post frozen replay (left) vs A–B RL policy (right)
C:pre→post COM (frozen replay)
mean Δd = -0.040, 66% toward p = 1.1e-12
C pre-RL (frozen)
C post-RL (frozen, same traj)
Neurons
COM distance to reward
A–B COM (policy / exploration)
mean Δd = -0.066, 73% toward p = 9.3e-23
A prediction
B RL policy
Neurons
COM distance to reward
